Customer Reviews

This book is a thoughtful memoir and spiritual journey by a remarkable woman. The author's medical training and experiences served, not to distance herself from a seemingly incomprehensible God who makes people suffer, but to draw her and her family closer to God by seeing His work in

their lives. Sometimes, I think it is much harder for people with a scientific turn of mind and training in the sciences and medicine to believe in God when all education is pretty much "it all happened by chance" and is indeed structured to teach that chance is the only reason things happen. Believe me, I went to school for 9 years after high school and all of that training was science and a lot was overlapping with the science that medical doctors study, because I studied biology, biochemistry and immunology. So I resonated with this book and Dr. Neal's journey--especially when she writes that "science and spirituality were assumed to be incompatible." Interestingly, the description of drowning (the author nearly drowned in a river in Chile) is exactly what a friend of mine described to me had happened to him as a child. The patients who describe their spiritual experiences, rather than embarrass Dr. Neal, help her to see God is present and working in all of our lives. She keeps her eyes wide open and her faith becomes stronger, not weaker, in the face of many tragedies. If you yourself are asking "Who is God, what is He, is there a God and how do I form a relationship with God?" this book could be an inspiring starting point. It is gripping, the stories are real-life and huge.
