Nexus: Nexus, Book 1

Synopsis

"Nexus is the most brilliant hard SF thriller I've read in years. It's smart, it's gripping, and it describes a chilling reality that is all-too-plausible. Ramez Naam is a name to watch for." (Brenda Cooper, author of *The Silver Ship and the Sea* and *The Creative Fire Mankind Gets an Upgrade*) In the near future, the nano-drug Nexus can link mind to mind. There are some who want to improve it. There are some who want to eradicate it. And there are others who just want to exploit it. When a young scientist is caught improving Nexus, he's thrust over his head into a world of danger and international espionage, with far more at stake than anyone realizes.

Book Information

Audible Audio Edition

Listening Length: 13 hours and 12 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Angry Robot on Brilliance Audio

Audible.com Release Date: July 25, 2013

in Books > Science Fiction & Fantasy > Science Fiction > Cyberpunk #264 in Books > Mystery,

Thriller & Suspense > Thrillers & Suspense > Technothrillers

Customer Reviews

What does it mean to be posthuman? It means with the right software, you can fight like Bruce Lee and perform like Peter North. It means your mind can network with those of other posthumans. It means your intelligence is vastly superior to that of mere humans. But can humans and posthumans coexist? Does the rise of the posthuman necessitate the death of the human? The questions posed in Nexus aren't new, but they have rarely been explored in such an entertaining fashion. Although it is swallowed like a drug, Nexus is a nano-structure that creates an interface between the brain and computer software. It acts as a networking platform and an operating system. It creates the potential for one Nexus user to control another. Nexus is both a regulated drug and a prohibited technology. In short, it is illegal. Should it be? Kaden Lane is one of a select group of people who, in addition to researching Nexus, is permanently infected with it. He thinks Nexus should be available to

everyone, although he's worried that some users (and some governments) will abuse it. Samantha Cataranes works for a division of Homeland Security that responds to emerging risks. She views Nexus as a risk. She could lock up Kaden but she'd prefer to enlist his help for a more critical mission: determining whether the Chinese are using Nexus to create remote controlled assassins. If Kaden doesn't want to spend the rest of his life in prison, his task is to cozy up to Su-Yong Shu, suspected of being the primary architect of China's neurotech program. She is also suspected of being posthuman. Kaden is a well-rounded, believable character. He isn't the only one. Samantha is Kaden's backup on the mission, a role that troubles her because she will need to use Nexus.

In the future, Nexus is the new popular nano-drug that allows humans to temporarily connect minds & share thoughts with other current Nexus users. Kade Lane, young scientist, in his experiments radically improves Nexus. Not only he managed to make the Nexus influence/presence in human brain permanent, he also installed OS to Nexus nano-bots. So Nexus users can install addons/applications to help them in using their body (just like we now do on our phones). Don Juan app, Bruce Lee app,... (I think you can guess what they can do.) Uses and abuses of Nexus are infinite. Such ground-breaking discovery, of course, stir-ups a lot of trouble. Politicians say that Nexus is a threat to humanity, army describes it as security risk, criminals see it as source of easy earnings... Which side will Kade pick when neither choice is a good one? Some people described Nexus as sci-fi spy thriller. I can not disagree with them, the label fits, there sure is a lot of action, chasing, fighting etc. But that is not my favorite aspect of this book. The best thing about Nexus is that Ramez Naam poses a lot of intriguing questions. This is a great novel to be read in a book club because there will certainly be a lot of good subjects for discussion: Is government wiser than humanity? Whose place is to choose what we can and what we cannot use? If some invention that is made for good can also be used for bad purposes, is that reason enough to censor & block it - or should we always take the chance? What is the thing that makes us human - when will we stop being human and become something else? Nexus by Ramez Naam reminds me of my favorite science fiction authors: Cory Doctorow with dystopia/government conspiracy theme, Michael Crichton with unexpected twists and action/adventure, Arthur C.
