John Jamieson's book, *Wealth Without Stocks or Mutual Funds* is a wealth of information! Literally! I'd highly recommend this book for anyone that is truly looking to diversify into something other than the stock market. My wife and I have incorporated several of these strategies right away after learning about them.

John's system is a complete game changer!! I have had the privilege in purchasing and reading both *The Perpetual Wealth System* and *Wealth Without Stocks or Mutual Funds* and it is a complete game changer. I am a 25-year old real estate business owner with a wife and a 1-year old daughter and our financial success is only looking up thanks to John's model. All the concepts he speaks of are so simple and logical -- not only to understand and envision, but also to ACTUALLY implement. Ideals only remain ideals if they never actually come to fruition. John's tactic of "sticking it to the banks" is just incredible. This book allows every day folks to be one step ahead of our broken financial system and to keep OUR money where it belongs... in our wallets. Thanks John, I look forward to working with you!

I'm writing to say thank you John and Colleen. You are the best team of business professionals I have ever worked with in my adult years of dealing with people (and I'm almost 59 now). You are both jewels, so pleasant, so helpful and genuine. Thank you especially for your book John. You inspired me. Before I found your videos and read your book I was literally financially scared. I was at a low point, standing still and I didn't know what to do. I had a clue of things I could engage in to get my financial life in gear again but I did not know what to do or how to do it. But I'm not scared anymore. Your story, your book, and my conversation with you on the phone has now moved me to massive action in my own terms and my own way. I am up, pumped, confident, and alive again. I'm branding myself from within myself...just being me and making an extra \$300 - 500 per month consistently because of it. I'm not on the big stage. I'm not well known in any business circles or industries. I have no desire to be in the lime light. I am just living life, individually helping others to get what they want and having fun at it. Just doing this is providing an income that I'm having fun building and receiving. With that in mind I have a second email to follow this one which will explain to you my "individually helping others" concept. For me it's better than a job or a business...it's a way of life that I enjoy that just happens to generate an income for me. Thank you for inspiring me

John. Keep that golden, genuine personality of yours. It is working wonders in inspiring others!!

Boat load of high octane wealth explosion ideas that are suited for the average Jane. He has ideas for those who are currently broke and needing to start at financial ground zero, to those like me who are self-employed and don't have a pension set up, with only social security to look forward to. He provides clear and sound strategies to getting started - the options are plentiful and suited for all with different risk tolerance. As someone who is already an experienced real estate investor, I found his knowledge to be grounded in reality, doable and encouraging. Once you finish reading the book, you can write down the choices that resonate best with you and develop steps to customize building your wealth. And as someone who has invested retirement IRA's in the stock market and am now in the hole, wishing that I didn't touch the money at all... I will now use John's strategies to rebuild and dig out of that hole. There is HOPE again - have no fear. I have done much research on the topic of Whole Life Insurance and Self-Banking, and actually found John online before I read his book. He has proven to be genuinely helpful, extremely patient, and utterly professional in helping me to plan. This is THE pocket financial planner that everyone needs.

Great book and I will be contacting John to see about implementing some of the great strategies included. His website that he refers to in the book has more info to utilize and I look forward to checking that out more thoroughly. So many avenues he gives us to grow and protect wealth that are not normally discussed by a typical financial advisor! Pick and chose what will work for you and your situation is how I understand it and look forward to speaking with the author.

As a retired senior executive of a global Wall Street firm, I found this work to be an immensely informative sourcebook of alternative methods of wealth-building. It identifies less well-known usages of existing products and services which enable self-directed activities such as self-funded business investments through an IRA and self-funded loans through a negotiated bespoke insurance annuity with its tax advantages. Importantly, Mr Jamieson offers to facilitate contact with experts in various fields if a closer discussion of a method is deemed necessary. The examples put forward are especially interesting for those who would be interested in taking a more active role than simply allowing banks, insurance and investment firms to take over the process of wealth creation for a fee(s). If nothing else, the book will suggest a new perspective of wealth building.W. Ferrari
