## THE MEDUSA FILE

SECRET CRIMES AND COVERUPS  
OF THE U.S. GOVERNMENT

CRAIG ROBERTS

## Synopsis

From World War II to present, there has been hidden within the highest levels of government secrets that you are not supposed to discover. During the period of 1940 to this day the power brokers, working from their positions of trust, have committed and then covered up the most heinous of crimes known to mankind. Investigative journalist Craig Roberts, author of "Kill Zone--a Sniper Looks at Dealey Plaza", now provides us with the results of his ten -year investigation regarding the secret crimes and coverups of the U.S. Government. You will read his case files on such subjects as the Japanese "Devil Unit 731" who experiments on American POWs in WWII with germ warfare weapons--and what happened when the war ended and the commanding officer was hired by the government instead of hanged for war crimes; Operation Paperclip in WWII when the U.S. brought Nazi scientists to America to work for us on our weapons programs instead of standing trial as war criminals; CIA and military mind control experiments on unsuspecting citizens--including children--without our knowledge; Secret drug and bacteriological weapons experiments on the American population; Atomic guinea pigs, Agent Orange, and the Gulf War Syndrome; what really happened to over 30,000 U.S. POWs after World War II, Korea and Vietnam; International assassinations, drug smuggling and money laundering; What the media did not tell you about the shoot down of TWA 800, the bombing of Pan AM 103, the Oklahoma City bombing, the crash of Arrow Air in Gander, Newfoundland, the derailment of the Sunset Limited in Arizona, the World Trade Center bombing in 1993, and much moreâ |.

## Customer Reviews

Craig Roberts is one of the few credible people investigating the government cover-ups going on in our generation and the past. The details and bibliographies, plus the availability of the author on-line for the average 'Joe' to query impressed me no end. You can tell by the background Colonel Roberts has that he is not a sensationalist trying to sell books and videos; he is a soldier and a cop who found out the government he laid his life down for was using him and lying to him, and they screwed the wrong guy that time. As a film producer and screenwriter who is working now with Craig to produce his amazing life story into a feature film, I have read many books trying to find the right story to expose these creeps and this is the main thrust of the upcoming film "The Medusa File". Read the book - don't wait for the movie. Matt Pittaway, [...]

I have about 600+ various books on corrupt government practices (both US and foreign governments). Some are real well researched and substantiated with FOIA and other such documents, others lean more towards the la-la land of "could be" conspiracies. The Medusa File book belongs to the group of well researched works with substantial amount of evidence. After reading it I can think of at least 30 other books whose reading I could have saved by opening this one first. I only wish author Craig Roberts read Antony Sutton's book "Wall Street and the Russian revolution" which documents how the Communist uprising was financed by Standard Oil and Wall Street financial interests. (Russia as a banana republic - with no bananas.) It would have been really interesting to see which way Roberts could add that information to the contents of this book... that Washington not only abandoned 10,000s of POWs to Communist States, it CREATED those Communist states in the first place.

Having read the book twice, I ran various sections of the book through Korean Vets and Gulf War Vets. They validated the facts of the book as they were presented and confirmed that the approach of what "really" happened was not accurately presented by the government. Excellent reading - I have shipped additional copies to my friends who agree that this is the best government going in the

world today, however, there is an evil presence gaining ground at the price of people's liberties, happiness and lives.

This book makes sense of a good many things I've read and wondered about. It's important. Why were 20,000 American POWs left in Russian hands at the end of WW II? And other POWs in Korea and Vietnam left in enemy hands? Why were American soldiers dying of heroin overdoses at the rate of 2/day? Why was important White House aid Vincent Foster murdered? Clinton laundered drug money through the Rose Law Firm, and Foster was in on it. The Mossad blackmailed Foster into 'keeping them informed'. The CIA discovered that Foster has \$2.5 million in a Swiss bank. Knowing that Foster couldn't have come by this much money honestly, the CIA reports this to the White House and transfers Foster's ill-gotten gains from the Swiss bank to the U.S. Treasury. The administration has to silence this 'loose cannon' before President Clinton can be implicated. McVeigh's primitive truck bomb couldn't have done the damage done to the Murrah Building. There were other explosives set, two of which were found, and chemical evidence of explosives other than McVeigh's primitive bomb. Why were important leads not followed? Why were witnesses who described a rocket rising to home in on TWA 800 threatened and ordered not to describe what they saw.

Mr. Roberts did an excellent job exposing the darker side of government and US foreign policy since 1942. Unfortunately, there's nothing stopping the powers that be from continuing their assault on America and the Constitution. But with this book, at least they're exposed for who and what they are: a clear and present danger, which, if allowed to go unchecked, will cause even more harm than before. Thanks Mr. Roberts, for shedding light on things that have remained in the dark for far longer than they should.

Craig Roberts follows his wonderful success, "Kill Zone, A Sniper Looks at Dealey Plaza", with this excellent description of many of the covert conspirational activities of our federal government. Like his above mentioned book, this is a read that you will probably have a hard time putting down after first beginning it. The information is important, well researched, and extraordinarily relevant to our current situation. To Craig Roberts, once again, "Bravo Zulu!"

This is an outstanding book. Roberts puts forth a great investigative effort on a topic that more of us should be interested. He depicts numerous historical events, then challenges the reader to

extrapolate current events. At times this book will have you looking over your back. It provides weeks of discourse with other readers. Thanks, Craig, for this outstanding source of information.

This incredible book blows the lid off of our government's involvement in assassinations, mind-control, drug smuggling, abandoning POWs, the Amtrak derailment & the OKC bombing coverup. A must-read.
