## Customer Reviews

My daughter is only six months old, but my niece and nephew are 3 and 4. I use this book to read them stories at night time. I even let them pick the one they want to hear. Having so many stories and so many illustrations they never get bored. This book is like a treat. At their age 100 seems like a million. They can't wait to the day we read all of them.

My son absolutely loves this book, and with so many stories to read, by the time you finish the book you can start again and not have to buy another book that you are sick to death of reading. There is lots of colorful illustrations for him to examine in great detail, and it works great on my kindle. I'm so glad this works on other devices too, sometimes when we are staying with the grandparents it can be so great to just use my smart phone instead of bringing the kindle along with us. It has also been a great encouragement for him to start reading. I highly recommend this book for your child, I'm sure they will love it as much as my son loves it.

This is quite a collection and it's great to see so many stories all in one place. It's sort of like a one stop shop for bedtime stories, with something for every taste. Each seems tailored for younger children, which is great because sometimes books targeted at the 10-year-old and up market can kind of confuse (and then bore) really young kids. All of the stories are accompanied by great illustrations that help illustrate the action and all are fairly short which is another great feature of this book. The brevity keeps the kids interested and involved in the stories and also helps whoever is reading to them not become bored to death! The length also means that you can read more than one aloud at a time and still make the bedtime deadline. My niece and nephew always want me to read them a few stories at a time and this is a great book for that they can look through the book and pick out a few of their favorites, based on the pictures. All of the tales are original (as far as I could tell, that is I'd never heard them before) so you don't wind up duplicating content. I think this is a wonderful collection that any parent of young kids should add to their collection.

First of all, this is the first book that I have seen in years that is tailored for children in Preschool

through 2nd grade. It is a wonderful collection of 100 fairy tales for children of all ages. As a mother of four with two children ages 5 and 6, it is a great collection of stories that are short and sweet. Each story is well written. It opens a child's level of imagination in ways that allow them to explore, use critical thinking skills, while enjoying a great story. The stories are short in nature to keep the attention of any child, regardless of their age. The stories are written in a simple format that makes reading for beginning readers easy to follow. The pictures flow great with the stories. They are very descriptive while not being too detailed. They inspire the imagination in my children that many other stories have never done. The writer did a wonderful job keeping the stories short, sweet, and full of excitement. They are great for traveling with young children and even my 10 year old daughter has enjoyed a few stories. This collection of stories made the drive from picking up the kids from school, squeezing in a quick shopping trip, and a quiet ride home more pleasurable. This collection of fairy tales makes for wonderful bedtime stories too. My 6 year old loves to grab my kindle to read the stories. They are short and easy for her to read and understand. She is even able to read them to her younger sister. They often go back to *The Magical Mouse*, and read it over and over. I would recommend this collection of stories to any parent, grandparent, or caregiver. It's inexpensive and well worth the money. I wouldn't trade this book for anything!

This is quite the collection. I mean, 100 stories is a lot of stories and each one of them has cute good-looking illustrations. All of the images look great on my PC and Kindle Fire. This book is sure to become a favorite among your little ones as many of the stories are absolute treasures. Sure, some of the stories have a lot of fantasy involved in it like the story "How the Butterfly Got Its Colors," but that is to be expected of fairy tale stories. If your child likes fairy tales then I would definitely recommend this book.

Got a Kindle for Christmas and bought some books for my grand-daughters, ages 6 and 11. They can learn to use my new E-reader and work on reading skills. You have to love a win/win. Lots of Children's books for \$.99. Is that a win/win/win? Happy Gramma

Sharlene just keeps writing them better and better. Another great book for Children by Sharlene. Just like her 50 stories for 3-7 years old, she captures the imaginations and curiosities of children within these stories. My 8 year old daughter just loved them. The stories are short enough though does not limit the essence of a well educated written story. Within this book also well written and easily understandable poems. What I love about Sharlene's book is the definitions she has added at

the end. As a child I remember having to lookup a word in a dictionary solely took the fun out of reading. Here kids stay curious and have everything there wanting to read and learn more. Well done! I love her style of uncomplicated writing in order for older children being able to read the stories themselves. Another great book with stunning illustrations combined with talented writing. Stories yet to be told. We loved it!
