Synopsis

"Real science in Science Fiction. This is a must read for fans of SF.">(John S. Gertsch, Reviewer)
Perfect for fans of Peter F. Hamilton, Iain M. Banks, and Orson Scott Card, *Fear the Sky* is a hard-hitting sci-fi thriller that will have you looking at the stars in a different way. In eleven years' time, a million members of an alien race will arrive at Earth. Years before they enter orbit, their approach will be announced by the flare of a thousand flames in the sky, their ships' huge engines burning hard to slow them from the vast speeds needed to cross interstellar space. These foreboding lights will shine in our night sky like new stars, getting ever brighter until they outshine even the sun, casting ominous shadows and banishing the night until they suddenly blink out. Their technology is vastly superior to ours, and they know they cannot possibly lose the coming conflict. But they, like us, have found no answer to the destructive force of the atom, and they have no intention of facing the onslaught of our primitive nuclear arsenal or the devastation it would wreak on the planet they crave. So they have flung out an advance party in front of them, hidden within one of the countless asteroids randomly roaming the void. They do not want us, they want our planet. Their Agents are arriving.

Mankind is infiltrated by powerful, greedy aliens who are going to wipe humankind off the planet so they can use it for themselves. However, they need to do this subtly and efficiently, so mankind doesn't find out, panic and launch nukes. No sense taking over a planet if it is spoiled. The

aliens plant personalities into eight, super-strong, smart androids who can and do infiltrate the Earth's countries with nuclear weapons. Meanwhile, stealthy satellites watch overhead, assisting the androids and zapping anyone who threatens their plan. It is a lucky, misanthropic astrophysicist who discovers the plot and recruits some unlikely friends to protect the Earth. Fear the Sky starts off so well, so engaging, you just can't stop listening. Funny, quirky, likable characters that are refreshing and real, and you know you are in for a great book. About a third of the way in, they seem to lose their shine and start become two dimensional. The plot, so interesting and engaging at first begins to flatten, becoming linear and predictable. There really is no doubt during the listen who is going to prevail. But by this time, the story has so much momentum it is easy to slide into home. The book itself is not disappointing; rather it is fun and entertaining, well worth the listen, just that it could have been so much more. It never felt all that long, even at 20 plus hours (almost double most audio books), but it might have benefited from a less is more, with some thoughtful editing. R.C. Bray is the Narrator and he is brilliant. He has a unique, deep breathy voice that just keeps you wanting more. He could narrate a cookbook and make it exciting. Bray is one of those narrators you will follow regardless of the book. This is a flawed great book, well worth the listen.
